Eakman's Cafe Passes 35th Year in Business

Eakman's Cafe passed its thirty-fifth anniversary Monday, November 1st. It first opened in a building east of where the Mecca is now located, when water had to be carried from the court house well. It moved to the place now occupied by the Modern Cleaners, next to the Hensley building, — now the Mecca building. For the past few years it has been at its present location.

Douglass Eakman is now associated with his father, C. J. Eakman, in the business.

The cafe is one of the oldest businesses in the town, and justly deserves the congratulations extended by friends.

Get Your Car Stamp Before July 1st

The stamps will be serially numbered, will be gummed on the face, and will have provision on the back for entry of the make, model, serial number and State license number of the vehicle.

To guard against loss or theft, dampen the windshield rather than the adhesive side of the stamp. Make a record of the serial number which appears on the use tax stamp in the event the stamp should become lost.

Every owner of a motor vehicle which is used upon the highways should call at his local postoffice or at the office of the Internal Revenue Collector and secure a \$5.00 use tax stamp and affix it to his vehicle on or before July 1, 1943, for cash only, no mail order business.

Place conspicuously on the windshield.

Violators are subject to severe penalties.

This is only one of the many duties added to our post office work. Have the extra amount ready.

Other ways to cooperate now with the heavy mailing and the other many added duties are—rent a box and pay rent promptly. Buy stamps and postcards, etc., in large amounts. Call general delivery as few times as possible. Be kind and patient, in all dealings. It is the employees' desire to serve you and they can do it more efficiently with your cooperation.

More Incentive Payments For Farmers and Ranchers

This week in addition to \$30.00 per acre on 90% to 110% of your goal for peanuts and \$8.00 on from 90% to 110% of your goal for grain sorghums, we have been given a goal of 5500 acres for peanuts, 7,000 acres for grain sorghum, and 300 acres for sweet potatoes, and anyone desiring a goal for irish potatoes, if they will plant as much as 3 acres we can secure a goal from the State Office by requesting same.

The minimum goal on any farm will be 3 acres except in sweet potatoes the goal can be set at 2 acres.

If 5 acres of peanuts are dug with a goal not having been set, the goal may be set and the producer can qualify for a \$30.00 payment.

If no goal is set on sweet potatoes yet the producer harvests 2.8 acres he will qualify for payment on one acre at \$40.00 for one acre.

May we not overlook strip cropping when we plant sandy land—remember the government is interested in the preservation of your soil and will pay \$0.70 for this practice where it is not on the contour or \$1.00 per acre when on the contour.

If you do not strip crop then you should follow your peanuts with Austrian Winter Peas which at present cost less than \$0.07 per pound, yet the Government will pay you 8 cents per pound for planting at the rate of 28 pounds per acre thereby planting 3½ and 4 acres with the 100 pounds of the peas then the next spring will pay \$1.50 per acre to leave on the ground or turn under a good growth. This transaction gives the producer at least \$6.25 profit on the 100 pounds of Austrian Winter peas and a wonderfully improved soil.

We have new regulations on terracing pasture land which has just been released. A rancher can terrace pasture land so long as he follows terracing regulations.

This is an ideal time to sod old fields to bermuda grass for pasture with a payment of \$4.50 per acre on 60% live.

We have new and increased payments on eradication of prickly pears up to \$1.50 per acre. Mesquite up to \$5.00 per acre, underbrush or post oak up to \$5.00 per acre.

All practices for eradication of the above plant and brush should be appraised before you begin the work. Leave a request at the AAA Office for the acreage to be appraised as we will have a day's work for the range inspector before we can send him out in order to conserve tires and gas.

Under past programs it has been necessary that you have a portion of your crop land set aside for Government crops such as sudan, peas, cane, etc. In 1943 this acreage has been done away with, and such acreage may be used to plant crops for production, such as corn, grain sorghums, etc.

Two Jacksboro Men Reported Prisoners

First official clew to the fate of Texas' "Lost Battalion" came in War Department telegrams, Tuesday, notifying that two Jacksboro men were held prisoners of the Japanese Government in Java.

Telegrams follow:

Mrs. Hollis Allen,

Your husband 1st Lt. Hollis G. Allen Field Artillery reported a prisoner of war of the Japanese Government in a Java camp. Letter follows.

The Adjutant General

Lt. Allen is the son of Mr. and Mrs. Glenn Allen of Jacksboro and his wife, Mrs. Hollis Allen, is working in a defense plant at Dallas.

Mrs. Pearl B. Gilmore

Your son Private James W. Gilmore Field Artillery reported a prisoner of war of the Japanese Government in Java. Letter follows

Lost Battalion—One Year Ago

March 8th

Java was overrun by the Japs one year ago, March 8th, after unsuccessfully bombing it twelve times.

Mr. and Mrs. T. O. Glazner received a letter March 1st from the War Department stating that their son, Herbert, was missing in action. It was dated Feb. 28. Many others who have relatives with the Lost Battalion received the same as it had been a year ago, since Java fell.

Cards Received From "Lost Battalion"

Cards received from the "Lost Battalion" were from: Jim E. Hensley, Joplin; Joseph F. Argabright, Sidney L. Matlock, Antelope; Wayne Solomon, Cundiff; Lawrence Wood, Garth Oliver, Herbert Glazner, Geo. Ross, Harold Frazier, Joe Chapman, Miles Laird, Marion L. and James W. Frie, Luther J. Anderson, J. B. Pitts, Boyd E. Maher, Ward H. Simpson, Roy Gregg, Cosby and Cleo Sherrill, Drew Crain, Melvin Clay, Paul Leatherwood, John W. Rogers.

Some of the cards were taken to Mineral Wells and the foreign part was translated by American Japanese soldiers as follows: "Prisoners Mail Camp, Malay (Prison Camp near Indo-China)." The personal message was: "Unwounded. good spirits, love."

It occasionally happens that the family receives a letter before a permanent address is available to the War Department. Such word must come through Geneva, while the man's letters may come by more direct route. When such a communication is received, the original letter, or a photostatic copy should be sent by the family to the Prisoners of War Information Bureau, Office of the Provost Marshal General, War Department, Washington, D. C. If the original letter is sent, it will be photographed by the War Department and returned.—Prisoners of War Bulletin.

Mrs. R. S. Fillmore, Jacksboro, received a card Monday, from her son, Cpl. Benjamin D. (Max) Fillmore, reporting he is a Japanese prisoner and getting along fine. He also wrote that Sgt. Ed Worthington was with him. Both boys were members of the "Lost Battalion." This is the first word from them since before the fall of Java.

J. A. Crum has received a card from his son, James E., which states he is a Japanese prisoner of war at Montmein in Burma, signed in his own handwriting. He was with the so-called "Lost Battalion." This is the first that has been heard from him since the fall of Java.

Lawrence Wood, Japanese prisoner of war near Burma, writes he is well. The card was printed but signed in his handwriting, and was to his parents, Mr. and Mrs. J. E. Wood. This is their third card since September.

Pvt. Johnny Baker of the "Lost Battalion," wrote a card to his parents, Mr. and Mrs. H. Baker, Perrin. The card was signed in his own handwriting and dated March 5, 1943. He said he was well, and tell everyone, Hello. He was at Camp Hakodate, No. I, supposed to be in Japan. This is the first time to hear from him since before the fall of Java.

The War Department had notified them previously.

Methodist Church Receives Gifts Of Honor

organ can be purchased.

Mrs. Timberlake has spent a large portion of her life in Jacksboro where she, with her husband, reared her family. For many years she was very active in the church. She was president of the Missionary Society for a long time. If there was ever a person that could be called the Mother of a church, truly she has been the mother of Methodism in Jacksboro. Her life has been so devoted to the church that these gifts are but fitting expressions of her loyalty to the church that she has loved these many years.

The local congregation does not cease expressing its gratitude to the donors for their thoughtfulness and kindness not only to the one that they have honored but for the great help that they have been to this church.

Within a short time the local congregation will launch a campaign to pay all of the church debts by the first of August. The last eighteen months the local congregation has raised a considerable sum of money to finish the church. After the indebtedness has been paid the first of August plans will be made for a few minor repairs then the church will be dedicated. According to the rules of the Methodist Church no church can be dedicated until it has been finished and paid for in

full. When the building is dedicated it will be one that will do credit to any town, the size of Jacksboro.

At the present time Mrs. Timberlake is visiting her daughter in Cleveland, Ohio.

Within the last year; considerable gifts have been made to the Methodist Church, a large portion of them have been gifts in honor of Mrs. J. H. Timberlake. This write-up had been delayed but it was done because of the inability to secure a picture of Mrs. Tim-

berlake. The first gift that was made in her honor was the seating of the church with new Oak pews. This gift was made by Mr. and Mrs. J. J. Perkins and Mr. and Mrs. F. P. Timbelake of Wichita Falls, brother and son, respectively. Early in this Conference year another gift was made in her honor. This time her son and his wife, Mr. and Mrs. F. P. Timberlake, gave the money for the purchase of a Hammond electric organ, but due to the war the organ could not be purchased. However, \$1,500 of Government Series "G" bonds was bought and placed in one of the local banks where it will remain until such time as an organ can be purchased.

Mrs. Timberlake has spent a

Postal Unit Numbering System, In Cities

In order to permit the distribution of incoming mail by inexperienced clerks, who do not have a thorough working knowledge of primary distribution schemes certain of the largest cities in the United States have been divided into postal units. The number of each unit will become a part of the address, as,

Mr. John C. White,
1157 Jefferson Ave.,
Houston, 12, Texas.

Patrons should learn the Postal Unit Numbers of those with whom they correspond and include it as part of the address. To do this will speed up the separation of mail for distribution and permit a much more rapid handling by inexperienced postal clerks, thousands of whom have been employed to replace personnel who have gone into the armed forces. Amounts shown must be deducted each pay day from each employe's wages or salary and held for quarterly payment to the collector of internal revenue.

The law provides for a Victory Tax of 5 per cent of each employe's wage above \$624 annually, which would be 5 per cent above \$12 weekly, above \$24 bi-weekly,

Jacksboro Water Works Wins State Recognition

(From the American City Magazine)

A water works, like a good-looking girl, doesn't need to be big to be attractive. And the recognition that water-works operators in the State of Texas gave to the little city of Jacksboro proves that they realize it.

The waterworks for this colorful little town of 2,500 population has had an interesting career. As late as 1938, it was limited in size to small pumping capacity and served relatively few customers. However, during that year an oil boom boosted the population to its present size, and officials decided to establish a new adequate supply.

After a careful study of available sites, they decided to locate the new wells on a block of land owned by the city—used in the early days as a fort for soldiers to protect settlers from hostile Indians. This required new storage and booster pumps, since the location was some distance from the old supply. After one well was constructed, developing good water bearing characteristics, the town constructed a small temporary pumping station and ground storage facilities.

In 1940 the county replaced its old court house that was built back in 1885 with a new, up-to-date structure. While the building itself had become antiquated, there was nothing wrong with the hand-dressed limestone rock used in its construction. Consequently, the town acquired them and decided to design a new pumping station and storage facilities, setting it up as a WPA project. This enabled them to construct an attractive little fire-proof building, terrace the yard, and generally beautify the surroundings. Several hundred feet of new water mains were included in this work.

of new water mains were included in this work.

In recognition of this well-planned development, Texas water-works operators at their annual short school, held at the Texas A. & M. College last February, awarded the plant the honor of being the most attractive in the entire state.

The plant itself consists of one 286-gpm centrifugal pump and one 168-gpm pump, both three-stage and capable of pumping against a 170 foot head. It also uses a Wallace and Tiernan manually controlled chlorinator, and the storage for the water is supplied by a 119,000 gallon reinforced concrete ground storage tank, one 180,000 gallon steel storage tank, and one elevated tank of 75,000-gallon capacity. The plant equipment pumps the water into the ground storage tank and the booster pumps raise it to fill the overhead tower.

The booster pumps are located at the old plant. This consists of a single 215-gpm, two-stage pump working against a 150-foot head. A Wallace and Tiernan chlorinator also is located here. Parts of both chlorinators are interchangeable.

The water is very soft and requires no chemicals. In 1938 Mr. Tate reports, he took up 1,600 feet of six-inch gas iron pipe that was laid in 1911. He

observed that all pipe was in excellent condition.

Hawley, Freese, and Nichols of Fort Worth were the designers of the original plant. Owen T. Funk of Bridgeport, Texas, was the engineer on the reconstructed project.
